

Razvan Mocanu

Junior Front-End Developer

+40 723 772 112 razmocanu@gmail.com [LinkedIn](#), [FaceBook](#), [StackOverflow](#), [GitHub](#)

ABOUT ME - Ever since I was a little kid, I loved building stuff. Not just stuff: FUNCTIONAL stuff. I'd be alone in my room using LEGOs to build all sorts of intricate mechanisms and devices. Now, as I've grown up, I found myself a new type of LEGOs: Software Development. I've been around computers all my life, I know what makes them tick, and I know how to get things going with a "can-do" attitude.

SKILLS

FRONT-END - React, Redux, React Hooks, Angular 2+, HTML 4/5, CSS 2/3, SEO, ECMAScript 6 (ES6/7,8), JavaScript, Webpack, Material UI, RxJS, TypeScript, UI, UX, D3, Jest, TDD/BDD, Chai, Mocha, SMACSS / OOCSS, Foundation, Bootstrap, Gulp, Handlebars, Sass, Less, Photoshop, Illustrator, WAI

BACK-END - NodeJS, Pug/Jade, Firebase, Blockchain, PHP, MySQL, Git, Linux, Amazon AWS (S3, CloudFront), ActionScript, XML, JSON, REST, ElasticSearch, Redis, Bash, Nginx

OS & OTHERS - Jira, Agile, Windows, Linux, Mac, DOS/CLI, Word, Excel, PowerPoint

OPEN SOURCE PROJECTS

Pug Starter - 258 ★ <https://github.com/marianzburlea/pug-starter>. This allows beginners to start building a website in minutes, achieve Perfect Google Insights PageSpeed and deploy it online. My role as a contributor to this project is adding and maintaining new features.

QBlog - <https://github.com/quintyhh/blog-samp>. This project is a showcase of a custom Blog that is quickly managed, 100% responsive, with a Google Insights PageSpeed score of 100. Used tech: HTML5, CSS3, a dab of JavaScript for good measure. Sneak-peek at <https://quintyhh.github.io/blog-samp>

MyResume - <https://github.com/quintyhh/my-resume>. A simple, yet effective 1-page resume template, showcasing different CSS3 techniques, with a mobile-first approach. To give you a taste, you can check <https://quintyhh.github.io/my-resume> for my own personal resume.

Defiance - <https://github.com/quintyhh/Defiance>. A pet-project of mine, built as a utility and UX tool for Decal plugin environment. It's used to facilitate certain automation aspects in a, particularly old video game. Made at the request of ~450 people, most of which have been using it for the past 12 months with no issues. Made entirely in C#.

RB Replica - <https://github.com/quintyhh/roberto-blake-replica>. An attempt to improve and optimize YouTuber's Roberto Blake personal website (<http://robertoblake.com>), improving the Google Insights PageSpeed score while keeping the UI similar. Minor UX tweaks and accessibility improvements. Sneak-peek at <https://quintyhh.github.io/roberto-blake-replica/>

For more projects visit my personal profile <https://github.com/quintyhh> or the community that I am part of at <https://github.com/codetapacademy>.
